### \*Underarm to cuff

Each garment has an individual page like this, to help you make the right size choice first time!

Simply select a similar style of knitwear you currently wear and take two measurements:-

1. Across the chest fabric, from underarm to underarm.
2. The height, from collar to welt.

Then just compare the measurements (inches or cm) with the chart to find your size. (Note that most knitwear relax a little during wear so your own garment will have been slightly smaller when new!)

**Ladies beware!** Whilst you may be a medium in a ladies style, a small will probably fit you in a classic unisex garment as the sizing is more generous.
